

## STAR METAL – PROTECT LT

non-water miscible rust preventive agent

**STAR METAL – PROTECT LT** is a non-water miscible rust preventive agent with excellent dewatering properties. It is used for protection of alloy as well as plain carbon steel, cast iron, yellow metal and aluminum.

### Product properties / advantages:

- excellent dewatering properties due to the high-quality additives
- very good corrosion protection
- useable for indoor and outdoor storage
- special combination of additives giving a light oily anticorrosion film, no polymerization
- very good compatibility with many materials

### Technical data:

Appearance of concentrate	Density at 15 °C [kg/m <sup>3</sup> ]	Kin. viscosity at 40 °C [mm <sup>2</sup> /s]	Flash point PM [°C]	layer thickness [µm]
Dark brown, clear	840	4	65	Indoor storage: max. 24 Outdoor storage: max. 12

Suitability of materials	alloyed steel	unalloyed steel	cast iron	aluminum	yellow metal
	+	+	+	+	+

### Application:

rust preventive agent

### Remarks:

STAR METAL – PROTECT LT can be applied by immersion or spraying. The rust preventive film will be built effectively after evaporation of the solvent.

### Shelf life / Storage conditions:

stable for 24 months when stored at a temperature of 5 °C to 40 °C in unopened containers

### Remarks:

Minor variations in colour, odour and appearance are possible due to the raw materials chosen. However, these have no influence on the functionality of the product.

All information on safe and proper handling can be found on the SDS.
