Environment Policy

It is Star Lubricants' policy to conduct its business in a manner that is compatible with the balanced environmental and economic needs of the communities in which it operates. We are committed to continuous efforts to improve environmental performance throughout our operations.

Accordingly, the Company policy's key tenets are:

- compliance with all applicable environmental laws and regulations and standards;
- encouragement of concern and respect for the environment within the company and throughout its operations
- management of the business with the goal of preventing incidents and spills during the operational circuit from import to storage and then to final delivery
- quick and effective response to incidents or spills resulting from its operations
- periodic review and evaluation of operations to measure progress and foster compliance with this policy
